

Personal Letter of Recommendation

Michał Tyrolski had an internship related to AI/Computer Vision in my team from 01.07.2019 to 30.09.2019. At that time appeared as approaching the tasks entrusted to him with great commitment. Despite his short professional experience, Michał tried to go beyond the responsibilities related to the position of an intern, showing initiative in an independent search for unconventional solutions to problems related to the project. In addition to commitment, Michał also showed himself from a very good side in terms of knowledge related to the C++ language, he successfully promoted the use of new standards (C++14/17) as well as computer vision (spatial mapping) know-how. While performing his tasks, he found himself well in both research and project development.

Sincerely

Grzegorz Kisała
